

Elite CE700

The Elite CE700 wireless charger utilizes the latest Wireless Power Consortium (WPC) Qi wireless charging specification. By simply placing the phone on the charging pad, power is automatically and wirelessly transferred to the device for charging, without the inconvenience of plugs or cables. With its unique design, you can quickly change from flat to upright charging mode. This flexible design lets you adjust the charging position according to your personal needs, and truly enjoy this outstanding new technology.
