FEATURES

WATCH

All of your favorite content in one place.

DOKO allows you to watch and listen to all of your favorite content from ANY source. Netflix, Hulu, Amazon, Pandora, Spotify, Twitch, Crunchyroll, your hard drive- you name it, DOKO supports it.

Unlike today's streaming devices and set-top boxes, DOKO is not restricted to a predetermined number of "channels" or "apps". Watch anything your computer can watch, directly onto your TV- in beautiful 1080p high definition.

PLAY

Stream your PC games into the livingroom.

DOKO brings you unrestricted PC gaming direct to your TV. Experience a new way to play your favorite PC games, with complete access to ALL of them, whether they are from Steam, Origin, Uplay or any other source.

DOKO has 4 USB ports that allow you to use the input devices you already own: mouse, keyboard, game controller and more! No proprietary software or hardware necessary. Just the PC gaming you've grown to love: in the comfort of your living room.

SURF

Run any application your PC can, right on your TV.

DOKO offers an unbeatable internet browsing experience, period. Despite a decade of development, "Smart" TVs, set-top boxes, streaming devices and gaming consoles all have two major flaws in common: they cannot browse the internet as well as your computer can, and they certainly can't multitask while doing it.

DOKO lets you browse the internet and run any other application your PC can, right in the comfort of your living room.

DOKO

Use your PC in the comfort of your living room.

A PC streaming device that brings you the full functionality of your PC, anywhere in your home.
