

## MT7010

### 7" Mobile Data Terminal

Designed with ARM architecture and Android 5.1 platform, MT7010 allows low power consumption, along with the wide range of vehicle communications. MT7010 drives up your fleet management efficiency.

- Bright 7-inch PCT touch display with intuitive interface
- Ready to use auto-dimming function
- Health readiness via SAE J1939
- Integrated LTE, Wi-Fi/ BT, and GNSS
- Android 5.1 Supported

#### Connectivity Maximized

For maximum connectivity, MT7010 mobile data terminal is the perfect mobile data terminal with Wi-Fi 802.11 a/b/g/n, GPRS/HSPA+/LTE, and Bluetooth V4.1. Moreover, the terminal's integrated multi-GNSS reception of GPS/QZSS, GLONASS and BeiDou pin-points vehicle precision.

#### Getting Smart with Power

MT7010 is designed with vehicle-grade power protection against sudden surges, noise filtering, overvoltage/ lower voltage, overcurrent, and other car power hazards. Moreover, with the UPS (uninterruptable power supply) battery the device can prevent data loss by shutting down properly with enough time.

#### Built to Secure

Built with impenetrable durability in mind, MT7010 mobile data terminal can withstand the various environmental impacts when mounted on vehicles. This include the terminal's MIL-STD-810G to withstand various shock and impact. The terminal also builds in with water and dust resistance on various surfaces, allowing versatile applications.

#### User friendly interface

Utilizing DashON management software, the device information is easily accessible and configurable including, communication setting, power management and IO setting. For your added benefit, a complete SDK is also offered to make it easy for you to customize and extend the device with software apps. MT7010 also supports Android
